Bandai Namco Entertainment Inc. (Headquarters: Minato-ku, Tokyo; President & CEO: Yasuo Miyakawa) is announcing today that our "Bandai Namco Entertainment 021 Fund", a fund to invest in startups to create new entertainment and build its "IP (characters and other intellectual properties) Metaverse," has decided to invest in DeepMotion Inc. ("DeepMotion") based in the United States and SuperGaming based in India.

Under the Bandai Namco Group’s Purpose "Fun for All into the Future" and our vision for the mid-term plan (April 2022 - March 2025) "Connect with Fans," we will create new ways to connect with our fans so that we can leverage our IPs and foster deep, broad, multifaceted relationships with our partners, Group employees, societies, and IP fans around the world.

DeepMotion is both a development company with a strong track record in the development of AI-based automatic motion recognition technology and a SaaS company that provides its own motion generation services. Through this investment, we aim to incorporate DeepMotion's technology and expertise on AI-based motion generation and create new entertainment experiences using motion intelligence (*)

Super Gaming develops and publishes game applications for smartphones mainly in the Indian market and develops and provides its own game development engine platform. Through this investment, we will seek to expand our business by combining our expertise in IPs with a deeper understanding of the Asian market, which is expected to grow further in the future.

We will continue to invest in outstanding companies around the world in order to support our gaming business and introduce new forms of entertainment.
